

Stinger

CONCEALED TRAFFIC
SPIKE SYSTEMS

Guardian's *Stinger* Pedestrian-Friendly Concealed Traffic System is engineered and designed with below-grade spikes that will puncture the tires of offending vehicles while providing above-grade, non-penetrating teeth. The below grade teeth stay submerged until activated by wrong-way traffic. Only then is the spiked tooth exposed, puncturing the tire of the offending vehicle. The *Stinger* is ideal for shopping districts, schools, and private communities where a large amount of pedestrian traffic exists.

1134.100 In-Ground 3' (914mm) Concealed Traffic Spike System

Unparalleled Features in the Industry

- Top Plate Mounted Components
- Durable Stainless Steel Spring
- Heavy Duty Steel Construction
- Positive Stop Eliminates Wear
- Specially Engineered Teeth
- Reliable Zinc Plated Moving Parts

Benefits to You

- Virtually Maintenance Free/Easier Cleaning
- Trouble Free Operation
- Durable Spring Loaded and Counter-Balanced teeth
- Modular Style Provides Design Flexibility
- Eliminates Tire Damage in Unrestricted Direction
- Corrosion Prevention

Easy Installation Instructions Provided
Two-Year Limited Warranty

- 1416.110 GUARDIAN Warning Sign Post - Surface Mount - Bolt to Concrete - 4' (1219mm)

***Warning** Guardian Traffic Spike Systems are engineered to be used at a maximum speed of 5 miles per hour. Vehicles must pass over the unit so that the tire is parallel to the teeth and at any angle. Traffic Spike Systems require Warning Signs. Locating and installing a Traffic Spike System incorrectly or not using warning signs invalidates any implied or real warranty.
